LRS INFLATION MONITOR
SEPTEMBER 2019

The Consumer Price Index (CPI) declined to 4.1% in September 2019

The term inflation means a sustained increase in the general level of prices for goods and services. It is measured as an annual percentage increase (for example, September 2018 to September 2019). Take note that a falling rate of inflation means that prices are rising at a slower rate.

The **headline inflation** rate declined to 4.1% in September 2019 from 4.3% in August 2019. On average, prices increased by 0.3% month-on-month in September 2019.

The **food price** declined to 3.7% in September 2019 from 3.8% in August 2019.

Transport inflation declined to 2.4% in September 2019 from 3.1% in August 2019.

Public transport inflation fell to 3% in September 2019 from 9% in August 2019 (buses, trains and other forms of transport that are available to the public charge set fares and run on fixed routes.)

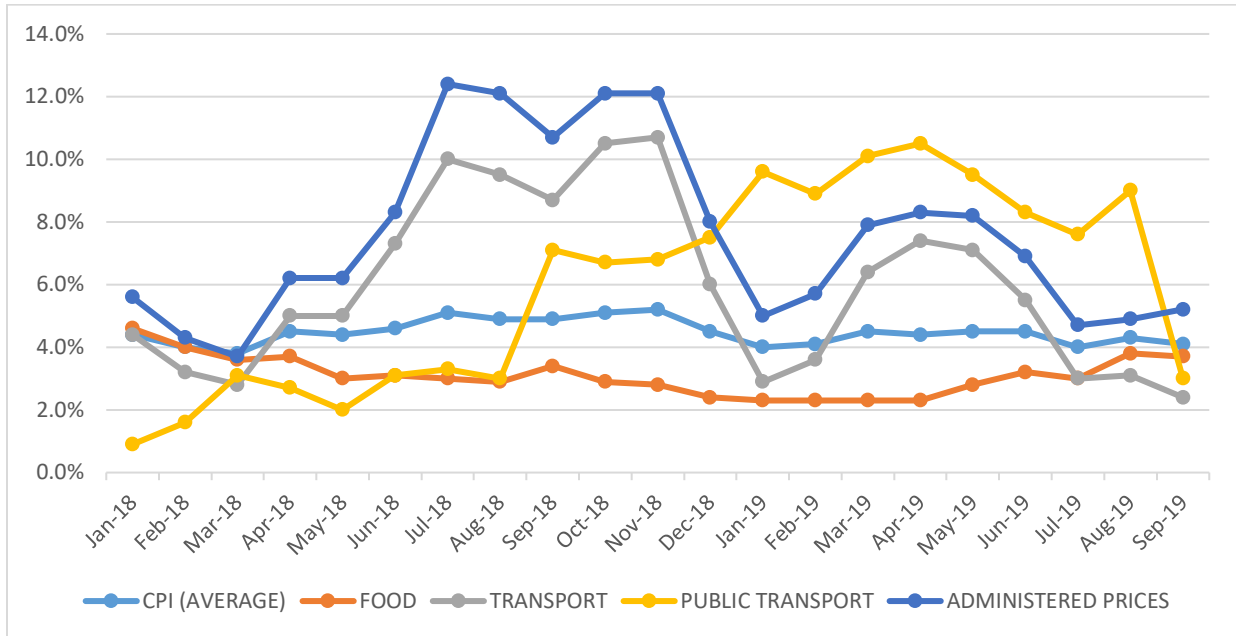

Administrator's price (school fees, telephone fees, electricity, trains, and petrol/paraffin) increased to 5.2% in September 2019 from 4.9% in August 2019.

Figure 2: Annualized increase in prices September 2019 by expenditure category

Statistics South Africa divides household monthly expenditure into 10 decile. The table shows that decile 10 expenditure was higher than decile 1 expenditure, indicating a high level of inequality.

Table 3: Annualised inflation by expenditure group, September 2019

	Monthly expenditure	Inflation Rate Sep-19
Average annual CPI		4.1%
Decile 1	Up to R1477 per month	5.5%
Decile 2	R1477 up to R2456 per month	5%
Decile 3	R2456 up to R3549 per month	4.4%
Decile 4	R3549 up to R4742 per month	4.2%
Decile 5	R4742 up to R6151 per month	4%

There is more than one inflation number. The inflation rate that is reported in mainstream media is the average inflation rate. Different groups, from the very poor to the wealthy, can experience different rates of inflation, because they buy different things.

The very low group (Decile 1) experienced an inflation rate of 5.5%, higher than headline inflation rate of 4.1%, while the very high expenditure group (Decile 10) had an inflation rate of 4.3%.

Figure 3: Annualised inflation rate (%) by province, September 2019

The provinces with annual inflation rate **lower than or equal to headline inflation** were North West (3.6%), Eastern Cape (3.7%), Mpumalanga (3.7%), KwaZulu-Natal (4%), Gauteng (4%), Free State (4%) and Northern Cape (4.1%). Western Cape and Limpopo provinces had annual inflation rate **higher than headline inflation**, at 4.6% and 4.8% respectively.

An administered price is defined as the price of a product, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly or through one or other government agencies/institution without reference to market forces. For example, school fees, telephone fees, electricity, trains, petrol/paraffin, cell calls and public transport. This rate is incorporated into the overall CPI inflation rate.

The October 2019 CPI figures are expected on 20th November 2019
