Inflation Monitor

The Consumer Price Index declined to 7.5% in September 2022

The term inflation means a sustained increase in the general level of prices of goods and services. It is measured as an annual percentage increase (for example, September 2021 to September 2022). A falling rate of inflation means that prices are rising at a slower rate.

The headline annual inflation rate decreased to 7.5% in September 2022 from 7.6% in August 2022. The Consumer Price Index (CPI) increased by 0.1% month-on-month in September 2022.

The food price increased to 12.3% in September 2022 from 11.5% in August 2022.

Transport inflation declined to 17.9% in September 2022 from 21.2% in August 2022.

Public transport inflation declined to 22.1% in September 2022 from 23.6% in August 2022. (Buses, trains and other forms of transport that are available to the public charge set fares and run on fixed routes.)

The administrator's price (school, telephone fees, electricity, trains, and petrol/paraffin) declined to 13.4% in September 2022 from 15.8% in August 2022.

Statistics South Africa divides household monthly expenditure into 10 deciles. The table below shows that the decile 10 expenditure was higher than the decile 1 expenditure, indicating a high level of inequality.

Table 3: Annualised inflation by expenditure group | September 2022

	Monthly expenditure	Inflation Rate September-22
Average annual CPI		7.5%
Decile 1	Up to R1 678 per month	10%
Decile 2	R1 678 up to R2 802 per month	9.4%
Decile 3	R2 802 up to R4 056 per month	8.4%
Decile 4	R4 056 up to R5 434 per month	7.7%
Decile 5	R5 435 up to R7 058 per month	7.6%
Decile 6	R7 058 up to R9 097 per month	7.5%
Decile 7	R9 097 up to R11 931 per month	7.7%
Decile 8	R11 931 up to R16 660 per month	7.9%
Decile 9	R16 660 up to R26 021 per month	7.9%
Decile 10	R26 021 and more...	7.1%

There is more than one inflation number. Different groups, from the very poor to the wealthy, can experience different rates of inflation because they buy different things. The very low group (Decile 1) experienced an inflation rate of 10%, which was higher than the headline annualised inflation rate of 7.5%, while the very high expenditure group (Decile 10) had an inflation rate of 7.1%, which was 0.4% lower than the inflation rate of 7.5% in September 2022.

Figure 2: Annualised inflation rate (%) by province | September 2022

The provinces with an annual inflation rate **lower than or equal to headline inflation** were Western Cape (7.3%), North West (7.3%) and Gauteng (7.5%). The provinces with an annual inflation rate **higher than headline inflation** were KwaZulu-Natal (7.8%), Northern Cape (8.2%), Mpumalanga (8.3%), Eastern Cape (8.4%), Limpopo (8.5%) and Free State (8.7%).

The Consumer Price Index is known as the headline inflation rate and is also referred to as the official inflation rate. The month to month prices of over a thousand goods and services go into the calculation of CPI.

An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly or through one or other government agencies/institution without reference to market forces. For example, school fees, telephone fees, electricity, trains, petrol/paraffin, cell calls and public transport. This rate is incorporated into the overall CPI inflation rate.

The October 2022 CPI figures are expected on 23rd November 2022
